Request regarding accuracy check test • calibration of 15ppm bilge alarm

This product is important equipment in order to monitor preservation of the marine environment. It is also an extra-sensitive measuring device and it might become less accurate due to repeated use over the years. For accuracy assurance, regular accuracy check test by our company or our service agent or check and calibration at our factory is necessary.

- 1. FOCAS-1500C to which MEPC60(33) is applied.
 - O If the unit is more than 5 years old, we recommend you accuracy check test by our company or our company's service agent or calibration at our factory as early as possible. In order to keep the accuracy of the unit, you are also recommended to carry out calibration at our factory or accuracy check test by our company's service agent once a year or once every two years.
- 2. FOCAS-1800/2000 to which MEPC107(49) is applied.
 - The following "precision certificates" are included with all FOCAS-1800 shipments. For the rule compliance, the certificate validity is within 5 years after issuing date. Therefore, before it expires, be sure to carry out accuracy check test by our company or our service agent near you or calibration at our factory. Or the unit may be replaced by a calibrated 15ppm bilge alarm.

Precision certificate
精度証明書
Precision is proved as follows.
下記の通り精度を顧明します。
Model FCCAS-2000

FOCAS-2000 precision certificate

- O FOCAS-2000—Replacement of detecting part(Sensor unit) separately sold can be accepted. As the completion of every five years' calibration.
- O In order to keep the accuracy of the unit, you are recommended to carry out calibration at our factory or accuracy check test by our company or our company's service agent once a year or once every two years.
- ★ If you get inadequate accuracy due to status of use, main unit exchange etc will be necessary. Therefore please contact our company or our representative offices in advance. (Contact information)

Procedure for accuracy check · calibration of 15ppm bilge alarm

-ALL MODELS-

- 1. To assure accuracy, please request regular <u>accuracy check test</u> by our service agent or our engineer or <u>calibration</u> at our factory.
- 2. The following certificate will be issued after accuracy check or calibration. (Information in this certificate is subject to change without notice.)

Step 1

If certified engineer attend the vessel (or in the workings of the agent's factory) and <u>accuracy</u> of the bilge alarm stays within the guidelines, he will issue the following temporally certificate and hand one copy to you. Please retain this copy on board a ship until you receive formal certificate sent by our company or our company's representative offices at a later date. If accuracy of bilge alarm is outside of correct range, one of the following three actions should be taken.

- 1 Part replacement based on our condition (FOCAS 1500C/2000)
- 2 Replacement of the complete set (FOCAS 1800/2000)
- 3 Calibration and repair at our factory

FOCAS-1500C temporally certificate

Replacement of detecting part (Sensor unit) separately sold can be accepted. As the completion of every five years' calibration.

Please request the sensor unit (with precision certificate) to our office or our company's representative offices. We will send the sensor unit with replacement manual, ship's crew can replace with new sensor unit.

Reference: certificate of certified engineer

The following certificates are issued to the certified engineers of our service agent. According to the regulation, only certified engineers can carry out accuracy check test.

This certificate becomes invalid if your belonging company changes.

*Revised sequentially after Sep 2021

Accuracy check test performed by the authorized agent without the certificate is not valid.
